Wrap Up

Goal of this workshop: lecturers and service centres will be able to …

- identify **opportunities** for the deployment and maintenance of their eLearning products and know-how in their **institutional context**.
- build on **success factors** and to tackle **stumbling blocks**.

Reflexion

Opportunities, success factors, stumbling blocks:

1. Joining and developing networks?
2. Partnership with editors?
3. Continuing education?
4. Organizational factors?
5. Legal issues?
6. Description of product?

Open questions?

Wrap Up I

Opportunities in institutional context

- Networks: existing networks
- Partnership with editors: marketing support
- Continuing education: support for further use within own institution
- Legal: support by internal service units or editors
- Organizational factors: constant support by service units
- Product profiles: present our products and services to other institutions/networks, foster international exchange

Wrap Up II

Success factors

- Networks: build on existing networks, technical compatibility
- Partnership with editors: stand-alone products
- Continuing education: systematic market research
- Legal: copyright clearance, clear copyright conditions
- Organizational factors: perspective of “working mode” instead of project
- Product profiles: systematic description, embedded in repository (SWITCH pilot)

Wrap Up III

Stumbling blocks

- Networks: lacking contacts
- Partnership with editors: little finance support, very specific demand
- Continuing education: different target groups! Different organization form
- Legal: CC not yet confirmed in Switzerland
- Organizational factors: lacking interest/priority
- Product profiles: high requirement towards systematic description (“lost in cyberspace”)

Next steps

- You will receive presentations and “fact sheets”
- Online Feedback & Questions
- Bilateral contacts (Need for support of information exchange?)
- **Workshop II** on June 14th 2007 in Berne
- Preparation for Public Event
- **Public Event** on Monday, October 15th 2007
- **Further networking** supported
  - by SVC (until summer 2008?)
  - By SWITCH (after autumn 2007 – repository pilot)

Thank you!

- Coordination team
- CCSP VC-Supportzentrum University of Berne
- Speakers sharing their experience and expertise
- Your active participation

Two last things to say:

- Badge in the BOX!
- Good bye :-)
